ARTICLE INFO

Article history:
Received 6 August 2014
Accepted 13 August 2014
Available online 20 August 2014
Editor: Y. Ricard

The publisher regrets that Table 3 of the published article, which lists the finite Euler rotation poles for Corsica–Sardinia relative to Eurasia, did not show the correct rotation angle for the Eocene (50 Ma). The correct value (95° instead of 5°) is given in the corrected Table 3 shown here.

The publisher would like to apologise for any inconvenience caused.
