

## **Faculty Position in Geomechanics and Modeling Complex Geotechnical Systems**

The Department of Civil and Environmental Engineering at Northwestern University is seeking a new faculty member in the area of Geomechanics and Modeling Complex Geophysical and Geotechnical Systems. The successful candidate will support our educational and research emphasis on sustainable infrastructure and is expected to conduct research in fundamental and/or multi-scale analytical approaches to geotechnical problems. Outstanding individuals working on related topics also are encouraged to apply.

This tenure track appointment will support the Department's mission to provide sustainable infrastructure, materials and services to society, protect human health, and preserve the natural environment. Further details on our vision can be obtained by visiting our web site at [www.cee.northwestern.edu](http://www.cee.northwestern.edu). Strong opportunities exist for collaboration and joint appointments with a variety of related units, including other Departments in the McCormick School of Engineering and Applied Science and Geological Sciences in the Weinberg College of Arts and Sciences. The search is focused at the assistant professor level, but exceptional candidates will be considered at any level.

Applications will be accepted until the position is filled, but in order to ensure full consideration, applicants should apply electronically by uploading to the following link a cover letter, resume and at least 3 references by November 1, 2010:
