

## ***Two permanent posts for Lecturer / Senior Lecturer***

We are pleased to announce that there are two permanent posts in water related fields available at the University of Sheffield. The first is in the Catchment Science Centre, created in 2005 in collaboration with the Environment Agency of England and Wales, while the 2nd is to complement the Pennine Water Group's activities; both will be based in the Dept of Civil & Structural Engineering. The posts are:

- \* Lecturer / Senior Lecturer in Catchment Science in the Department of Civil & Structural Engineering (priority areas of interest are Waterways Engineering, Environmental Systems modelling, and Environmental Economics, but open to suggestions)
- \* Lecturer/Senior Lecturer in Water Engineering (hydrology, hydraulics, hydrodynamics, flood risk and surface water management, and sediment and solute transport, particularly welcome research that relates to urban water infrastructure activities)

These posts are available immediately. Please visit <http://www.shef.ac.uk/jobs/> to find the full details.
